

AMENDMENTS TO THE CLAIMS

All claims currently pending and under consideration in the subject application are shown below. Claims 1, 29, and 38 are amended. This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1-17. (Canceled).

18. (Currently Amended) In a computer system having a graphical user interface including a display and a user interface selection device, a method of archiving within a client management tool for collecting measurements associated with a network and client devices on the network, wherein the client management tool ~~that~~ performs both a client management function and an archiving function based on the collected measurements, said method comprising:

receiving an entry selection indicative of a user selection, at the client management tool, to archive client management data, wherein the client management data comprises at least one of capacity planning data or performance monitoring data corresponding to measurements collected by the client management tool;

obtaining a selection of a set of client management data; and

creating, within the client management tool, ~~the selected an~~ an archive file having the selected set of client management data ~~within the client management tool~~.

19. (Original) The method as recited in claim 18 further comprising displaying an entry selection indicative of a date in which to extend the archive.

20. (Original) The method as recited in claim 18 further comprising displaying an entry selection indicative of a user designation of the date in which to extend the archive.

21. (Original) The method as recited in claim 18 further comprising receiving an entry selection indicative of a user selection to restore an archived file.

22. (Original) The method as recited in claim 21 further comprising displaying a list of archived files, wherein the step of receiving the user selection to restore an archive file includes selecting one of the files in the list.

23. (Original) The method as recited in claim 18 further comprising receiving an entry selection indicative of a user selection to delete an archived file.

24. (Original) The method as recited in claim 23 further comprising displaying a list of archived files, wherein the step of receiving the user selection to delete an archive file includes selecting one of the files in the list.

25. (Original) The method as recited in claim 18, wherein the obtaining step occurs prior to the receiving step.

26. (Original) The method as recited in claim 18, wherein the receiving step occurs prior to the obtaining step.

27. (Canceled).

28. (Canceled).

29. (Currently Amended) One or more computer storage media having computer-executable instructions for performing a method of archiving within a client management tool that performs both a client management function and an archiving function, said method comprising:

receiving an entry selection indicative of a user selection, at the client management tool, to archive client management data, wherein the client management data comprises at least one of capacity planning data or performance monitoring data corresponding to measurements for a network and client devices on the network collected by the client management tool;

obtaining a selection of a set of client management data; and

creating, within the client management tool, ~~the selected~~ an archive file having the selected set of client management data ~~within the client management tool~~.

30. (Previously Presented) The method as recited in claim 29 further comprising displaying an entry selection indicative of a date in which to extend the archive.

31. (Previously Presented) The method as recited in claim 29 further comprising displaying an entry selection indicative of a user designation of the date in which to extend the archive.

32. (Previously Presented) The method as recited in claim 29 further comprising receiving an entry selection indicative of a user selection to restore an archived file.

33. (Previously Presented) The method as recited in claim 32 further comprising displaying a list of archived files, wherein the step of receiving the user selection to restore an archive file includes selecting one of the files in the list.

34. (Previously Presented) The method as recited in claim 29 further comprising receiving an entry selection indicative of a user selection to delete an archived file.

35. (Previously Presented) The method as recited in claim 34 further comprising displaying a list of archived files, wherein the step of receiving the user selection to delete an archive file includes selecting one of the files in the list.

36. (Previously Presented) The method as recited in claim 29, wherein the obtaining step occurs prior to the receiving step.

37. (Previously Presented) The method as recited in claim 29, wherein the receiving step occurs prior to the obtaining step.

38. (Currently Amended) A computer system having a processor, a memory and an operating environment, the computer system operable to execute a method of archiving within a client management tool that performs both a client management function and an archiving function, said method comprising:

receiving an entry selection indicative of a user selection, at the client management tool, to archive client management data, wherein the client management data comprises at least one of capacity planning data or performance monitoring data corresponding to measurements collected by the client management tool;

obtaining a selection of a set of client management data; and
creating, within the client management tool, the selected an archive file
having the selected set of client management data within the client management
tool.
